WORK EXPERIENCE

Mphasis Limited(Software Engineer) 2022 - PRESENT

Airline Reservation System

An airline reservation system designed to allow users to search for flights, book tickets, manage reservations, and view flight details. The project focuses on creating a user friendly and accessible interface for seamless booking experiences.

Responsibilities:

- Use Angular to build reusable components for a dynamic user interface.
- Implement dependency injection to manage services and improve code maintainability.
- Utilize Angular routing for seamless navigation between different views and pages.
- Employ responsive design techniques to ensure the UI works well on various devices.
- Use pipes for data transformation and formatting to enhance user experience.
- Create and consume services to fetch and manage data efficiently.
- Test components and fix any issues using browser developer tools.
- Ensure compliance with accessibility standards for all users..
